

Exercise: Given a valid Reactjs Component, make your first hello world app.

```
import React from 'react';  
  
class App extends React.Component {  
  render() {  
    return (  
      <div>  
        Hello World!!!  
      </div>  
    );  
  }  
}  
  
export default App;
```
